

DECODING DYSLEXIA

WHAT IS DYSLEXIA?

Dyslexia is an unexpected difficulty in learning to read in a person who has good intelligence, strong motivation, and who has received appropriate teaching.

Dyslexia is a language-based learning disability. It refers to a cluster of symptoms that result in difficulties with specific language skills, especially decoding, reading comprehension and/or reading fluency. Dyslexia can be mild or severe.

YOU MAY BE DYSLEXIC IF YOU...

- Read slowly and with much effort
...But are often the one to solve the problem
- Can't spell; have messy handwriting
...But your writing shows terrific imagination
- Have trouble remembering dates and names
...But you grasp the big picture and demonstrate out-of-the-box thinking
- Have difficulty retrieving and pronouncing spoken words
...But have excellent vocabulary and ideas
